

Q = Main interviewer (Cath)

Q2 = Second interviewer (Alex)

A = Mum (Denise)

B = Dad (Travis)

C = Child 1 (Jeremy, aged 11)

D = Child 2 (Cerys, aged 9)

Q Right so I'm going to start recording and hope that this recorder has enough power and enough space left on it to record the tech tour. OK so we're going to start in the living room. So we'll just sort of go round each room and see what kind of things you've got. So you're ready? OK so what have we got over....sorry I was treading on a remote control there....so what have we got over here?

C We have a TV, 3 speakers.

D Xbox.

C Yeah the Xbox 360. We have the internet box. We have a Sky box. And I'm not sure if we still have it but we used to have a Wii here.

Q2 A Wii in here?

B No that's up in Cerys's room I think now. Been put away.

C Another speaker.

Q So is it a sort of stereo that you've got here, is it a CD player or....?

C This one is a Bluetooth one. Then we have a Rioch? one here. The same down here.

Q2 Same down there.

C ??? Then we have our Hon? Exit? I'm not sure how you....

Q2 Tied in with all of them up there?

C Yeah.

Q2 Oh I see.

D Can't forget this, this is tech too.

C And the telephone.

Q And the telephone. So would you play on the Xbox, do you play on the Xbox much in the living room?

D Yes.

Q You do?

C Yeah.

Q OK. What sort of things do you play on the Xbox in the living room?

D Minecraft.

C Minecraft, Lego Star Wars and Netflix, that's YouTube.

D Lego Jurassic Park.

Q Lego Jurassic Park.

C Yeah, not so much on the Lego Jurassic Park. It's Cerys's but we don't play it as often.

A Because Jeremy doesn't like it as much.

Q You don't like it as much?

C And nor does Cerys because the first levels are too weird and it's practically impossible.

D I was thinking it would be like dinosaurs and stuff, but no you just run around being humans.

Q Ah, so you would like it if you could actually be the dinosaurs? That would be better?

C Yeah well that's what we actually....which is like ??? game player you could actually be the dinosaur.

D In this one level that we've already completed you'd be ??? that's like blue and the other ???

C Yeah. Well we can't be any like Tyrannosaurus Rex's.

Q Why would you want to be the dinosaur do you think rather than the humans?

C Too many people are ???

D So you can strike Jumanji.

C Just us.

Q Just us? OK. So what else? Let's go steady. So just make sure that we've not missed anything. Do you have anything in here like AI assistant, do you have anything like a Google Home or Alexa or anything like that in here?

C No. I'll do lights.

Q You've got the lights. Yeah that might be....yeah.

A Are you going to light them. I mean technically...

C The main light.

Q Do you have a radio in here at all?

A Not in here no because the kitchen radio is loud enough to hear from here anyway, so....

Q Oh right OK. Do smart phones and laptops get used in here as well?

A Oh yeah, all the time.

C We have the ???

Q OK, because that's kind of like travelling tech isn't it really, it sort of moves around the house.

A Yeah but I'd say it probably gets used here the most.

Q Is your TV a Smart TV?

A No.

Q OK, but you do get Netflix and things like that?

A We've got Netflix, yeah. It is...is it a Smart TV? It has got its own basic channels included within it, and it's meant to be HD but we don't have a good enough aerial to really see the benefits of HD, so we don't really have much. And some kids broke in about 5 years ago and chucked an egg at the telly when they realised they couldn't get it off the wall, so it's had a slightly damaged screen ever since.

Q Oh that's really harsh.

A Yeah.

Q So what about anything like....you've got books in here I can see, you've got lots of books. So I'm looking at kind of non-digital things as well. So you've got a lot of books in here. What about sort of any toys do you have in here? Do you keep any toys in here?

Time 5:00

C I've got like ???

Q Oh fantastic, so this is music.

*Plays drum*

C I use my ???

Q2 You do. You did show me one thing on the first visit though, do you remember what it was that you showed me?

C No.

A We've also got a....it's kind of a mini games drawer, ???

Q Aha, you've got like a mini games drawer.

A Yeah. We've got Othello, the kids have recently lost Monopoly so....

Q So you keep all the games in there, there's some in here as well.

A Yeah, there's like Balderdash and the ??? game and there's some card games and stuff about. So it's like the kind of games that you might get out for like whole family games, Christmas games that sort of thing, they tend to be down here.

Q How often would that sort of happen do you think?

A A couple of times a year, not a lot. You know it is like when everyone's all together, and that hardly ever happens.

Q Yeah. You had Thanksgiving recently didn't you?

A We did yes.

Q Did you do anything special for Thanksgiving?

D Yes.

A Well it was Cerys's birthday and Thanksgiving so we had bit of a.....

Q Oh was it a double whammy?

A Yeah. So we had like some people stayed over with Cerys for her birthday on the Friday night and then had a bit more of like a ??? jelly and ice cream sort of level of treats on Friday night. And then we had all my family came up from down south so we had a big feast for Thanksgiving dinner.

Q Oh amazing.

A But yeah we didn't sort of hang around playing games in the evening because I was knackered and went to bed at 10! So you know they were staying down the road. It's the first time they've done that. When they've stayed in the house we're more inclined to get a game

of cards out and do that until everyone actually falls off to their bed. But I think they were trying to give us a bit of space and realised that we were a bit knackered.

Q Did you get in touch with any relatives sort of via Skype or computer or anything like that for Thanksgiving?

B I messaged my brothers on like Facebook, Messenger on Facebook, that was about it really.

A Oh apparently they got my missing niece on Skype but I missed that moment. Did you speak to [female name]?

B Yes, she was in the room on the phone, yeah. So we did yeah.

A So I missed it.

B She....on Thanksgiving Day she'd got her own phone sort of thing, chat thing.

Q Ah OK, and where does she live?

B Cornwall.

Q OK. So that's really nice that you were able to get everybody sort of together.

A Yeah, because she was like the only missing person basically for like the whole family. Because my sister was here and her husband, and then her three daughters. The two other daughters were here, so she was just like the most obvious missing person at the table. So yeah, technology!

Q When you send sort of Facebook messages do you send any like virtual cards or any sort of gifts or anything like that?

B I didn't, other than just Happy Thanksgiving. And that was to maybe half a dozen friends and what have you, because I have all these connections in the States ??? you know, just saying Happy Thanksgiving and a few turkey jokes and what have you, you know.

Q So elsewhere in here we have...let's have a look. So we've got board games. Any kind of construction toys like Lego, anything like that?

A No not these days no.

Q Did you used to have?

A We used to have, I mean there's a big bag of Lego over there but it never ever got played with much.

Q Oh right.

A I really tried, yeah.

B They used to play with the Brio railway more than anything probably.

A Yeah that was the biggest construction of Jeremy's lifetime I think. Lego only ever got useful by Cerys who decided after a while that she could use it to build like a stable for her horses to make play with her horse more interesting, but that was the most it ever got played with really. And you know that idea I had where Jeremy would like go and build some sort of construction set thing and you know be really boyish and build a mansion or whatever, it never happened.

B He'd smash and take it apart.

A Yeah he'd take it apart, 'I'll do that', smash it to pieces 'I'll do that'. Build it? 'No, bored now, it's in pieces, whatever'.

Q So let's see. Any sort of arts or craft materials kept in the lounge at all?

A Kept in here, no, they tend to migrate to here but we try and keep them elsewhere.

Q So they sometimes kind of like get played with here?

A Yeah.

Q OK. Because I think we're sort of looking at where they get used in terms of space as well.

A Yeah, yeah, they'll get brought to here and then I try and turf them out again and have my table back and get rid of the clutter.

Q Do Jeremy and Cerys have many toys that sort of migrate down here, or....

A Mostly their phones really.

Q Aha.

B Cerys's been doing a lot of drawing lately and that all tends to migrate down here.

Time 10:00

A Yeah Cerys's drawings. And my new drum kind of moves around at the moment ??? playing it.

B ???

A Yeah.

Q2 Did we take pictures of Cerys's journal last week – I don't think we did did we?

Q No we didn't because it was at school.

Q2 It was at school wasn't it, yeah.

A Cerys, is your journal here, for these guys to see your journal, is it here, your big one, all your drawings?

Q The play diary I think we're calling it. Or is it still at school?

D It's back here.

Q It's back here, oh brilliant, we'd love to take some pictures of it.

A Where is it then? Go get it.

Q2 Would you run and find it for me please? Thank you.

Q Oh that's great.

D If I can remember where I put it.

Q OK. So I think, are there any weapons in here? Jeremy, do you have any....

A Weapons?

C Cerys's ??? we do have two wooden swords.

Q You have wooden swords, OK.

C Yeah we could just go ....bop!

Q OK.

A We have a poker for the fire – if it comes down to proper weaponry!

Q I think it's more in terms of play things.

B Steam iron's quite deadly.

Q The steam iron – well yes. OK so Jeremy do you want to take us through to the next room and we'll have a look and see what kind of things we can find there?

C Yes.

D I do have one at school, but I can't find that one. And then the other one you gave me, I know where that is but I started a drawing and then I decided I'm not in the drawing mood so I didn't finish it.

Q Oh OK that's fine, don't worry, there's no pressure. OK, so kitchen.

C Onwards! We have two broken lights. We have another light broken there.

Q Well lights do that sort of thing. Ah so there's a radio in the kitchen, is it a digital radio?

B It is yeah.

Q OK.

C Then we have the oven, the fridge, the freezer over there. We have the stove. The sink.

Q Any sort of CD players in here or anything like that?

C The toaster.

B Just have the radio.

Q Just the radio, OK.

C And that's all.

Q OK, that's great.

D This is the play diary you gave me, and this is the only picture that I didn't finish. It was going to be a wolf on ??? finish it.

Q Oh that's amazing. That's fantastic. Where are you getting the idea to draw that?

C YouTube.

Q You got that from....?

D Yeah, YouTube.

Q OK. Which site, do you know, is it a site you go on a lot?

D It's called How 2 Draw Animals and the number 2 is the actual number, not the letter.

Q Aha, I'll look at that up, that's great. And it's showing you how to draw it based around circles, is that right?

D It does the circles and all the simple things first, and then you add more detail to it and add all the fur.

Q And so how do you follow the instructions, do you sort of....

D He just draws a little area and then there's a slot next to it that tells you what he's doing. And then he takes his hand away so then you can pause it and do the actual drawing yourself.

Q Oh fantastic, that's really great, I love the face.

C So a bit like step by step.

Q Step by step.

C Yeah.

Q OK, so do you play anything in here, do you ever bring your phones in here or your laptops or anything?

C No.

Q No, this is not a room where you do stuff generally?

C No.

Q OK.

C We also have that.

Q Yes, the heating system, yeah. OK. Excellent. So where do you want to take us now?

D Up.

Q Up. Is there anything in the....

C ??? in here.

Q Yeah?

B Yeah there's nothing out there.

C A light. Four lights that don't work very well.

Q OK so there's nothing in the entrance hall. What about any outdoor toys here, I can see a bike. So let's see.

Q2 Do those lights work?

C They're very dim.

Q2 Very dim, OK.

C ???

Q2 That's a little bit helpful, I think I can see the wording now.

Q So any other kind of sports equipment or vehicle type stuff in the entrance hall?

C No.

D Camping things.

Q Ah camping things.

B There is a camping shelf.

Q Is this when you...the equipment that you take to festivals and things like that?

C Yeah.

B And this is full of juggling balls, Diablo and all that sort of....

Q Oh cool, juggling.

B ....and ribbon that you can, you know what do you call this?

Q Oh that's fantastic, so where would you use those?

B Sort of some circus-y things.

Q Ah, that's amazing. So those are circus equipment.

B Yeah.

C That's my ???

Q So what's that that you've got there Cerys?

D You put it on the string and then you roll it around by moving one of the sticks.

B Diablo.

Time 15:00

Q Diablo. Aha.

B You throw it up in the air and get it spinning.

D Spin it ???

C So where's ??? gone?

B Isn't really an indoor thing is it?

Q So this is something you would do at the festival on camp or something like that?

B Yeah.

Q Where else would you do it?

B Denise's better at it, she does fire chains and all that.

D Fire fly.

Q Does she?

B And she can juggle, you know, I can ??? got a bit of circus that's around for the festivals mostly, but we get it all out in the summer and some stilts we have around.

Q You've got stilts?

B Just little ones. I don't know where they are at the moment.

Q That's incredible.

B ??? like chain saws, I don't know if she does juggle those!

C Onwards. We can't go in the bathroom right now.

Q OK.

C ??? have the usual, bathroom, shower, toilet.

B No technology in. Not yet.

Q2 That's OK.

Q That's absolutely fine.

C It is still technology.

Q Anywhere that you do not want us to go that's fine, don't worry, if you could just let us know if there is any tech or any kind of like...

B I've got a room that you probably don't want to go into.

C It's just the ??? any tech in there.

Q OK. So what's this room then, is this kind of like....

D Mum's office.

Q This is the office.

C Mum's office. She has a double screened PC. A wireless mouse. She has a wireless pen for it. Actually these....yeah they are....OK, we have the box, speakers, a printer, more speakers, black ??? and some chargers.

Q OK, and I can see a microphone as well there. So what would that be....

C She has Random 10 so she speaks to Cortana.

Q Oh right so....

C 'Cortana, open up....' something. We have this. We have this, we put it out in the sun and then we charge stuff with it. Don't know sort of ??? We also have her camera and photography stuff, she's a builder? photographer.

Q Oh yes.

C And camera's being a bit of a creep. Yeah, have we seen?

Q Are you hiding? Do you want Alex to take a picture of you hiding?

C Then we have dangle light. Cerys just is ??? fell.

Q2 I can't see her any more, she's gone, oh no she's back.

Q So digital camera.

C By the way, my mum's name has [spelling].

Q Does it?

C Yeah.

Q I'm sorry.

C No, I just noticed that and decided to tell you.

Q No thank you very much Jeremy, that's great. I'm just making notes but I'll make sure I make them correctly so....

C Now.

Q Yeah now. So there's speakers in here. Is there any kind of like television in here or anything like that?

C No.

Q Radio?

C No.

Q Do you keep any of your toys or games in here at all?

D She's got a printer.

Q Aha.

C I already said that.

Q Great, I'll make a note.

C And no, no toys in here.

Q And would you guys ever come in here, or is this kind of like where your mum's space is?

C Sometimes but mainly our mum's and dad's.

Q And dad's as well, OK. That's great. OK so where are we going now? That way? OK.

C My room. And ??? I'll like it rarely ever use it ??? terrible.-

Q Aha.

C ??? multi-colour lights terrible the controller broke. And it's ??? to replace that because that one is actually terrible at ???

D ???

C I have a lava-ish lamp.

Q A lava-ish lamp. It's a glittery lamp isn't it?

C Yeah.

D It's a lava lamp.

C Here's the GoPro.

Q Ah yes. Hi GoPro!

D You're old friends.

C We have our....my 3D, I've forgot the name, DS.

Time 20:00

Q Oh right, a DS OK.

C And then a computer and my phone is on charge, also Cerys's.....

Q Can I sit on your bed, is that alright Jeremy if I just sit here and then make notes?

C Yeah.

Q Thank you.

C Then we have my phone a Cerys's old phone down there. She still keeps her old phone because.....

Q2 Is that down there?

C Yeah.

Q OK so you have a desktop computer in here.

C And that's practically all. That's our computer, lava-ish lamp, got all the ??? can you take that down again.

Q OK. You've got a smart phone haven't you Jeremy?

C Er....yeah.

Q And do you use that in here at all?

C Er...yeah, it's where I use it most.

Q OK. And what sort of things do you do on your phone up here?

C ??? games.

D Oh the power of technology!

Q Do you have an iPod or an MP3 player or anything like that?

C Cerys had an MP3.

Q You had one or you do have one?

C Cerys had one.

Q Ah right OK.

C Actually she does have it still, just barely ever uses it any more.

Q So do you have any kind of like....ooh, I was just going to ask about this. I can see you've got a programmable robot.

C It broke.

Q It broke did it?

C Yeah. Cerys dropped it at some point, I can't remember when.

D I didn't.

C I'm pretty sure it was you. One of its arms literally ripped off and a tiny bit of ???

D We were....the cat would go for it every time it moved so the cat would dart out of the room.

C Yeah. And then the other arm was half off, I lost its forearm, and when I tried to programme it again it just wouldn't move.

Q Oh no. So how were you supposed to programme it, how was it programmable, can you remember?

C You'd turn him on at the back, press the button, like press Forward, Forward, Stop, Backwards, Backwards, Left, Left, Right, Right. The Forward and Backwards would make it move a bit, the Left and Right would make it turn.

Q And so did you get much use from it?

D No.

C Cerys just didn't know what it....yeah.

Q Why was that do you think?

D It's boring.

C All it did was move, so it was boring.

Q OK and you couldn't connect it to the internet or anything like that?

C No.

Q No, you couldn't enable it in any kind of way. OK. And just looking at what's in there. Is that more sort of science....

C It's science, yeah. It was a long time and we just used it up in the one day.

Q Oh right.

D Well we kind of used a bit of it and then we got bored of it so we just dumped it in....

C Actually no. I used it all one day ???

Q Was it a science kit, sort of what is like chemistry or...

C Yeah.

Q OK, so what did it come with?

C Quite a few things. A lot of it we lost.

D Play-doh.

C Yeah play-doh, ??? packets of jam ??? a volcano with a ??? ??? colouring and vinegar, so then we could make a little volcano.

D You can also make volcanos out of lemons.

Q Are right with the....

C Yeah with lemon juice, it has the same chemical properties as vinegar.

D Just add bicarbonate of soda and food colouring.

Q Oh right, have you done that?

D Yeah I did it at school.

Q Oh amazing.

C And that's all.

Q That's all. OK.

C Oh hold on I have light sabers.

Q Aha, I was going to come to those, yeah.

C This one has kind of run out of battery.

Q They're both red.

C Not so much that one. And actually what you've got to do is....

Q Oh! That's amazing.

D I kill the ??? man.

C Urg...urg....

D ??? wait, Darth Vader is killing his own mind.

C That was a Jedi.

Q So they change colour. So you can literally become different....

C They are all the colours.

Q All the colours. What's your favourite, what do you like to do?

D Light blue.

Q Blue, is that because it's a Jedi colour?

C Light blue.

D I just like blue.

C It's my favourite, it's Jedi's light saber colour.

Q Aha.

C Onwards to Cerys's room.

Q So you're not on to the dark side. I just want to have a little look at this as well, because this is another colour Star Wars related. And you've got the Lego Star Wars....

C Disc.

Time 25:00

Q Lego Star Wars disc. Is that a computer game, or is it the movies?

C Movies.

Q It's the movies, OK. So do you play those in your room?

C Sometimes.

Q OK.

A Mostly he'll just go to like YouTube and watch it there and forget that he's got the disc behind him.

C ??? I like.

Q Oh OK.

D They're funnier.

Q Are they funny? What's the best thing about them?

C Probably the fact....

D The fact that sometimes the people get scared or something and then their hair will fall off, and then they'll have to go back for their hair and be like.....

C Yeah. And then my favourite part is probably the part in Episode 2, OK, it's where Darth Vader was still Anakin.

Q Oh yeah.

D Anakin Skywalker.

C Yeah, in training, he wasn't even a Pivi 1 yet.

Q Oh OK.

C And then Yoyo was on a planet and Darth Vader just appeared, and then....

D Oh he's really funny, he's ??? and like ???

C Cerys, and then he'll be like ???

D ???

C ??? I have found you. And then George Lucas is just like 'cut, whoa, whoa, cut, cut'.

Q Ah, so George Lucas appears as well in the films does he?

D Yeah.

C Yeah, and then he just says....

D And he says 'someone get Darth Vader'...

C Not yet. He said 'you're not in here yet'. And then Darth Vader is just like 'but come on, it wouldn't be very cool if I just appeared here and then we have a light saber battle, you know like....vroom, wham'.

Q So is this a Lego George Lucas?

C A bit, yeah. And then he's just like 'do you want a doughnut' and then Darth Vader's like 'sure, we'll go for a doughnut'. And then they...

D Someone take him for a doughnut.

Q So they're all getting doughnuts.

C Yeah, and they just walk off stage and then it carries on ??? confusion with Yoda and Little Han.

Q Oh, Little Han. Tiny Han Solo?

C Yeah.

Q Ah. That's cool.

D ??? that Han Solo's ???

Q Oh right.

D I'm engrossed with....

C Yoyo's here and Han is here.

D Tiny man. ???

B What are you doing?

Q We are getting round.

C Now Cerys's room.

Q Oh I just would really like you to explain to me what that is, because that is Star Wars related as well.

C That?

Q Yeah.

B They fight.

Q Amazing, OK.

C Peeo, peeo, peeo.....

Q So is this kind of.....this is like a non-digital game, or was it tech?

C Non-digital.

Q Non-digital but you can make your...

C You have to take them off and it's hard to get them on though.

Q OK. And who is fighting?

C Anakin Skywalker and ???

Q OK.

C ??? SO2 ???

Q So can you get different figures and put them on it, can you change them round?

C Yeah but I only have Cando ??? and Anakin Skywalker.

Q OK.

D I take them off ???

Q I somehow thought Cando ??? had more arms. Which is the one that has a lot of arms?

Q2 General Grievous.

Q General Grievous, I'm getting confused with General Grievous, that's what's going on. How could I! It's not easily done.

C Light saber!!

D You know in Lego Star Wars where he loses his arm, so he's crawling round on the floor. And then Tuatiaki? pounces at you. And like 'I'm a power'.

C Yeah but usually...but the first few times is where you don't even know somewhere and it's just like 'haaa...haaa...next' or you don't know that ???

D And then Jeremy found out I was serious, and then we just let him run around pouncing on ???

C But it takes like 3 minutes until he first pounces.

Q OK, yeah.

D He watched ??? just moving around on the floor, he doesn't move any of his body parts, he just slides across the floor.

Q Oh OK. Do you have any kind of soft toys in here at all?

C No.

Q No?

D I've got lots.

Q You've got lots. We will visit yours very soon. Do you have any dress up, any clothes....

C No!

Q No dress up.

C I'm not a playful person.

Q You're not a playful person?

C No, I ??? to play for.

A You used to have the dress up bag in here.

C But I did used to.

Q What did you have?

C For Halloween.

Q For Halloween?

C Yeah.

A You've not got anything left that's Halloween-y now. You've got one costume, a cape or something.

C ???

D I've got the witch one.

Time 30:00

C ??? maybe we've got a vampire.

A I don't believe that you've got none in here, that's a lie.

C It's in here.

D It's fun.

C I have the neck collar of a vampire.

Q Oh yeah. Oh with a nice glittery jewel.

C Yeah from last year, from last year. Last year I went as a regular weird person.

Q A regular weird person.

D Our dad was carrying a shovel around with him.

Q OK. Can I ask why?

C Just for something extra scary.

D He's got these two masks, and he gave one to Jeremy, and then he was carrying his shovel around and people would say 'why have you got a shovel' and he'd be like 'time to bury some bodies'.

C Yeah. Well actually more like 'time to dig up some graves' as he just went...and held it in both hands before putting it back up here. Because...for a bit of a joke. Next room!

Q OK. I've just noticed as well you've got a Lego Star Wars picture on your wall as well, so that's cool. Any books, do you have any books related to your interests at all?

- C No, they were here when I first moved in to this room.
- Q Oh OK, right, that's fine. I like your speakers by the way.
- C Thanks.
- Q Glowing light speakers.
- D It's water ??? speakers.
- C Yeah and if enough noise goes into it they jump up.
- Q2 Is that water in them and it ???
- C Yeah.
- Q2 I've got some footage of them.
- Q Oh brilliant, that's great. OK.
- C Into Cerys's room. Flashing LED lights.
- Q Wow.
- Q OK this is great. So Cerys what have we got in your room related to ??? Shall we do sort of non-tech first and then do tech, because I can see you've got quite a few sort of musical instruments for a start. Oh and your cuddly toys. OK.
- C My two guitars. Cerys keeps them in here.
- Q So you've got quite a few. What are they?
- D Well these....this one's a Housey Bingo. This one's another...
- C ???
- D It's a look like a Labrador, I picture it as a Labrador. Leopard, another leopard. I got this for my birthday not long ago from my friend Ava. I got this black cat....
- Q2 Oh I like that.
- D This is another leopard. Jeremy's white tiger ???
- Q Ah, so you've got a tiger that lives in Cerys's room?
- C She steals all of my stuffed toys. But I never play with them so I don't really care.
- Q What do you do with them?
- D I just leave them here and occasionally I'll play with them.

Q OK, what sort of thing would you play?

C An old wild play.

Q Aha.

C I'm sometimes there to play with on my phone.

D This is also the rock ???

C It's like Cerys and her friend ??? I'm like 'cool'.

Q OK. Would you ever sort of photograph your....do you ever take shots of your animals or anything in your bedroom with your phone or anything like that?

C No.

D No.

Q OK. So what else have you got? What else? Do you want to show us? Can you think?

D No.

Q No? OK.

Q2 That's fair enough.

Q Apart from ???

C Apart from Cerys's like Xbox, her TV and her computer....

D I've got a computer. I've got two phones, not three phones because one of them is broke and I don't play with it, but it still works.

C Quite ???

D Yeah. I've got those mini red speakers, ??? Xbox, I have a mini television that came with the Xbox for my birthday a couple of years back. And another stuffed toy. But my dad keeps putting them up here.

Q So you've got an Xbox in here and...

D Another stuffed toy.

Q Oh cool.

C You can find them anywhere, they're all over the place.

D Wait, where's the big lion? We have got a big lion, it's like....

Q I should have asked Jeremy, have you got a games console in your room at all?

C No.

Q No? OK. But you've got an Xbox in here?

D Yes.

Q Aha. And did you say you....

C She has her own DS.

Q So you've got a DS in here as well.

C Somewhere.

Q Somewhere, OK.

D Here.

B Have you played that ???

Q And do you have an iPod or an MP3 player?

Time 35:00

Q2 Yeah, showed it us in Jeremy's room.

Q Ah right, so that lives in here as well? Where else would you use that, do you use it around the house or....

D For the music.

Q For the music, so which rooms would you sort of use it for and....

D Just quiet and I'm bored and I like to listen to music, I'll just use it for music.

Q OK. Do you ever use it with your friends or anything like that?

D No.

Q No. What sort of things would you do when your friends come round?

D We would probably....a lot of my friends like Minecraft so we would play on Minecraft downstairs on the Xbox, or play Minecraft on my computer because I've got Minecraft on there. We would play on the trampoline in summer or run around and climb the trees on the forest next door.

Q And are these your guitars as well?

D No they're my brother's I just keep them in here.

Q Ah right OK, so these are Jeremy's but they live in here. OK.

C And I'm not bothered about taking them back, saves on space.

B The soundtrack of our house in the last 12 years, this thing.

Q OK.

B Because it just keeps going off if you know what I mean.

*Toy plays*

Q Is that remote control then?

B No it just....if you touch it or if you go near it or anything it's sort of been going off for the last 12 years.

D Me and Jeremy used to play this game, it's got a kind of alarm on it ??? the alarm. We would have to try and get as far away as like into a different room and under something before the alarm went off, otherwise we die.

Q That's a really cool game. I love that game. Do you play that much any more or was that a game you used to play?

D Used to play.

Q Can you remember when at all?

B I don't know that's been around forever, that track.

Q Has it? OK. So do you have any toys, like robots or anything like that in here, or anything that you can sort of like play with that might be tech. Do you have any toys that you can hook up online or anything like that?

D No.

Q No, OK.

Q2 Whereabouts do you do most of your drawing Cerys?

D In my room.

Q2 In your room. On the floor, or at your desk?

D Desk.

Q2 At your desk, I see.

D I move the keyboard out of the way so I've got space where the actual solid bit of my computer goes, which is along here. So I just perch my keyboard on here and then I've got this space to draw.

Q2 Very nice. Thank you.

Q And so do you keep your drawing materials in your desk as well, have you got sort of pens and....

D I've got my paintings and painting things in there, and I've got my drawing things there.

Q Aha, OK that's excellent. And do you have a CD player in here or anything other than your....that might make music, or a radio, other than your MP3 player?

D No.

Q OK.

D ???

Q Aha. You've got quite....are they DVD's?

D Some of them are DVDs, some of them are games.

Q OK, so could you show us some of them?

D Yeah. This one's one of my favourite ones because it's got....it's called Beethoven, and there's this man that hates the dog. And the dog as a puppy he did things he didn't like. And even when the dog got older he still didn't like the dog. Well the dog ends up saving him I think.

Q Oh right, oh that sounds really good. So where would you watch that?

D Downstairs.

Q OK.

D And there's Beethoven 2.

Q Oh right, it's a series.

D And I have Great ??? and ???

Q Oh that looks a very cute film. So you wouldn't watch sort of DVDs on your own in here, you would take it....

D I would go downstairs and we would have a family movie night.

Q Oh you have a family movie night? How often do you do that?

D Not often anymore.

Q Not often anymore? When did you used to do it more do you think?

D When I was 4, we would watch Jurassic Park, because I love Jurassic Park.

Q Ah right.

D And my favourite character is Blue.

Q Oh I don't know who he is, why is he your favourite?

Time 40:00

D Blue is the velociraptor and he's the alpha of this pack of velociraptor But there's another person that trained the velociraptor since Blue was a little child, so he's the proper alpha. Blue is the second in command, and this man is trying to fix the power but gets stuck in this dinosaur's cage, and this dinosaur spreads....it's got like those little flaps that go up here and he spits kind of black acid. And he spat it on the man and the man got it in his eyes. So he dropped his glasses so he couldn't get back out. And we didn't see the end but I'm pretty sure the dinosaur ate him.

Q Ah right, yes. So it came to a bad end.

D And the T-Rex, she broke loose when the power went out.

Q OK.

D These two children and the specialist, they had to go into the kind of park area where the rest of the actual outlands of Jurassic Park is, and then they were having to try to outrun all the dinosaurs around because there's T-Rex's and other sort of dangerous animals, like the spinosaurus, T-Rex. And my favourite part that I can always remember is where this kind of herd of gigaminus? were running and there was also these triceratops that were running. And then the T-Rex came out of the trees and got one of the triceratops's and it grabbed him and smashed him against the ground repeatedly to kill him. And then the next bit I remember is when the kids and the specialist were up in the tree, and the specialist finds a velociraptor claw and he shows it to the kids and says 'if we got hunted down by velociraptors, the velociraptors would sink this into our face'.

Q Do you watch anything else to do with dinosaurs? Do you ever see things like Walking With Dinosaurs or any programmes that you like about dinosaurs?

D No.

Q Have you got any books or anything like that? I can see you've got quite a few books here and I just wondered what your books might be about.

D I don't read most of them, but most of the ones I read are about animals. This is my favourite cover because it's got a cheetah on with it's cheetah cub, and I just find it really cute. I've also got Minecraft books, like this one.

Q OK. Are they like animals....oh right, 2019 Annual, OK.

D And I just enjoy reading them. The new update that have come on in this book, it's about the aquatic update.

Q Oh I remember the aquatic update. What happened with the aquatic update?

D We got coral, we got tropical fish, salmon and cod, and now you can actually go and swim around in the ocean and find them already in the ocean. There's also this new mob called the drowned, which can occasionally carry a trident around with it and throw the trident at you. The trident is a newly and arranged weapon, the first newly and arranged weapon I need to get in. And now there's more updates to it, like the village and pillage update, that came through Micro pocket edition, and my computer Xbox didn't get it because the aquatic update was the last S? update that the Xbox was getting. Xbox I think Playstation. And now there's another new update, 1.15, or 1.16, but it adds bees into it?

45:00

Q Bees?

D Yeah. I believe it's called Bees and Beetles.

Q Wow. So do you know when that's coming?

D It's already out now for YouTubers, because YouTubers get access to it.

Q Do they? OK.

D Yeah, which means it should be coming out soon. And I'm really, really excited. There's also a different update in boxes and sweet berries.

Q Oh, that sounds really cool. So have you watched the YouTube about the....have you watched on YouTube about the update, the bees one?

D Yeah, the bees and beetles. You can now run around in Minecraft world and in forests you can find bee hives and bees going around collecting pollen from flowers. And the bees will actually pollinate the flowers. And you occasionally find more flowers in a patch, which means the bees have pollinated it there. And if you break the hive without silk touch you won't get the hive and you'll get my bees stinging at you. But if you hold a flower when they're trying to sting you, they will try to sting you but they can't. And the box has many different animations. It's got three – well four if you count the standing in the br??

Q Yeah.

D And then you've got the sitting, and my favourite one is the sleeping animation, because the fox's back will be there, its head will be there, and its tail will be there over it,

slightly covering the face, and you actually get to see the fox's eyes close. And it's just really cute. But they've made fox's look kind of dumb, because ??? are kind of smart animals have their pupils facing inwards, and then the dumb animals have their pupils facing outwards, and then they've done that with the fox where the pupils face outwards.

Q Oh, so do you think that's accurate or not accurate?

D I think, because fox's are more intelligent than animal and humans because they know how to survive in harsh environments and kill animals and get themselves food. And that reminds me that, I think it was last night, that the light went on outside and we had a big fluffy fox in our garden.

Q Did you?

D Yeah. The fox itself was around that...if it didn't have any fur, and it had lots and lots of fur so it made it look poofy like that.

Q Oh, so it was cold, was it all fluffed up?

D Yeah.

Q Have you got a fox's den nearby then do you think?

D There's a fox living in the forest just over there.

Q Oh OK.

D We don't normally see him much, or her, but I have seen fox's two times in my life already because we live near the forest and the field, and each time I was on the field, on the hill.

Q Yeah. What sort of things do you play in the forest, or do in the forest?

D Oh we play survival games, like Walking Dead.

Q You play Walking Dead?

D Yeah. And when our friend comes round we play this kind of magic game where me and her will have all the powers and Jeremy will ??? and this person's making evil clothes and also we have to try and defeat them.

Q So where do you get ideas about the Walking Dead from?

D I used to watch a lot of Minecraft and Minecraft Walking Dead. So we just kind of copied the walkers from it and tried to find supplies to survive. And walkers are attracted to big light sources and loud noises, but they're not used to altitude. So if you're up in a mountain they won't come up.

Q Aha. And the game with the clothes as well, what were you sort of playing or thinking about when you were playing?

D I don't know, we just find it fun so we carried on playing it after we'd given it a shot. So it ended up being fun so we played it a couple of months back. And it's just really fun. Me and [girl's name] had the sticks of staffs and [girl's name] still has her staff somewhere, but mine got used because my friend [male name] and [male name] came round and I'm like 'don't touch that'. And he picked it up anyway and found this dead rat that my cat killed. So he picked it up with my staff and popped it in the river. So the river got really muddy and then you could just see the little feet sticking out of the water. And it was really funny because I'm like 'yahoo...' because I used to have a phobia of rats, because when I was in Jeremy's room when I was younger, like 4, we were staying up late and having popcorn when a rat ran across the hallway. And it was a big rat, like that big.

Time 50:25

Q Goodness me. And it had sneaked in the house. When you're playing those games in the forest how do you feel?

D I feel safe and calm because I've got the house that I can easily shout to. And then my friend just lives around the corner. And I've got another friend too that lives up that way. I have another friend that's that way but ??? new to our friends, because apparently her room is covered in this dangerous mold. So they've all that. And when I've been walking up to school I found this really funny, because I saw a half burnt car.

Q Did you?

D Yeah, there was a half burnt car along there. And then it was ??? this morning and you could just see all the little burned bits on the ground and a skid mark.

Q Oh no, I wonder what had happened there? Doesn't sound very good does it?

D Sounds funny though.

Q It sounds funny. So have you got any board games in here Cerys, I can see Chess up there, have you got anything else that you would play with in here maybe?

D No.

Q Oh, can I just have a sneaky peak at what that is. Is that a jigsaw? I think it's a Disney characters jigsaw, yeah.

D That one is a jigsaw. That one I got for my birthday, where you get these pens and then you get these different kind of shapes that you keep moving your pen around, like this.

Q Oh that sounds cool.

D To make some patterns like these.

Q Oh I see. Oh that's lovely. It's a bit like sort of Spirograph type...

Q2 Yeah I think that's what it's called, Spirograph yeah.

Q Oh that's great. So that's kind of like an art, creative art thing isn't it? So do you like using that or...

D I used it once and mummy washed all the pens so it was really useless.

Q Oh no!

D And one of these pieces broke.

Q Oh no. So it's not very sturdy.

D No.

Q Have you got any kind of like dress up or anything like that in here, do you have any sort of dressing up clothes or anything like that?

D My mum and dad put their work clothes here. I used to have these dresses along with this bit where I have this really nice red dress that has this kind of a flower on it. I believe I have it in my drawer. It's this one.

Q Oh gosh.

D I just need to find out how it goes here. And then I've got this that I'll wrap around the back.

Q Oh that's really pretty.

D And we have school discos every year, and every year I've worn this dress because I really like it.

Q OK.

D But the annoying bit is like you've got buttons down the back that I need to get my family members to do and it normally gets caught in my hair.

Q Ah, yeah, buttons can do that can't they. OK. So is there anything in here that we've missed do you think Cerys?

D No.

Q You think we've covered it all in here. OK that's great. And we know that there's no toys in the bathroom, is that right?

D Yes.

Q OK. So I think we are probably done with this part of the visit, I think we've probably done all of them – apart from outside. It's very, very dark out there but you said you'd got a trampoline.

D Yes, and we've got a light that we can use. And it's motion activated.

Q Oh right.

D That's how the light turned on when the fox came in the garden.

Q Aha. What else have you got outside, do you have any kind of sand toys or water toys or....

D I got this ball kind of bat game where you get a bat, and it's called Swingball. Where you've got a rope leading to a ball and you throw it round and you whack it with a bat.

Q Oh right.

D School have it and then I really liked it so I asked my mum and dad to get it for me for Christmas, and I actually got it for Christmas. It's still in the garden. And I got the trampoline at the next Christmas on. And then we've got this little shed where my dad keeps all his tools, because he's sort of a carpenter.

Q Oh cool. OK. So I think we'll probably go back down now. I think it might be your teatime. Do you want to pause that?

Time 55:00

Q2 Yeah I'll pause that.

Q Ah right, it's the red button. Yeah sure, oh if I put that there are you OK to...

B Is it on? Yeah no problem.

Q So you've got a basement as well

B I have, in the basement I have a laptop that I do my general computing on. I have another computer that I use Puppy Linux software on. I have three raspberry pi's.

Q Oh wow OK.

B And a projector

Q Do you ever do any like movie making or anything like that?

A I release a movie this week. Yay!

Q Do you? Ah. Do you have five minutes to tell me a little bit about that? You have a movie out this week?

A Yeah, well it's a film collective called Wow Ed Films that I bumped into like a couple of years ago here in Sheffield, and yeah basically heard they existed, contacted the guy who was like the director of the group and said 'can I get involved, I'm a photographer' and he said 'yeah we're making a movie in the woods tomorrow, do you want to come on down'.

And I went on down and they had a script and they had actors, and they had a woman who had like her camera and she was the film person. And I was like 'oh I've been brought down to do some as well' and you know I literally had just about figured out how to switch my camera into film mode, I really don't know what I'm going. But I do know how to frame things because I've got a good visual eye because I'm a photographer. So I was watching what she was doing and I was learning and stuff and getting finally involved and opinionated about stuff quite quickly, which I realised was quite quickly because [male name] said at the end of the day 'oh it's really good that you got involved so much, most people don't do that'. And I was like 'oh, did I do it wrong?' And then there was another movie, it was also well in process and about to be made, called Taking To The Boats, and that's the one that has just been released this week.

Q OK. And what's that about?

A Both of them basically are a bit of a response to Brexit. So the first one, Meltdown, running round in the woods was kind of like there was no NHS and everything had gone, descended to chaos and there was a bit of a vigilante thing.

Q So it was like apocalyptic.

A Yeah it was a bit apocalyptic. And then Taking To The Boats is again a bit apocalyptic but Brexit has happened basically, it's a dystopian future, and the main characters are fleeing because they have revealed a scandal involving the Prince – it's very topical! And then another one is being tortured because she made claims and allegations about someone and it's clear that the state have made their prosecution go away by having words with the other people who were her defence, so she's kind of fleeing as well for that reason. So they meet and they go on the run together, and then they don't make it.

Q Oh.

A It's a bit of a sad ending I'm afraid.

Q Oh, sad ending. What happens to them, can you give us a spoiler?

A Well....yeah, because it was so hard to film. It was great fun.

Q Where were you filming this?

A The parts that are shot in a house were here in Sheffield. And then we had a weekend away in Cleethorpes.

Q Oh right, so you could take to the boats?

Time 59:50

A Yeah. And we've got some shots like on Humber Bridge, and then we went to the Humber Yacht Club and they let us borrow some of their boats to try and film the bit where they take the boats, go out to sea in the ??? Only we only had one weekend, we're amateurs, we've got a budget of zero pounds basically. So we went and we were doing like loads of on scenes, and then one minute it was sunny, the next it was raining, and we were like going

‘we’ve got mad continuity problems between every scene, I don’t know this is really hard – agh’. And then we went down to the Yacht Club because we’d been on like the harbour steps doing some stuff, and we went down to the Yacht Club to try and do this scene, and we were supposed to be there like before the tide went out, but we were running a little bit late so by the time we got there the tide definitely had turned and it was beginning to go out. And as we were trying to get ready it’s going...and it’s flat isn’t it, like it’s all so flat around there.

Q It is, yeah.

A So it kind of disappeared quite quickly. And when we came to actually try and film like this where they’re going in the boats, like it’s supposed to look like scary, like they’re at sea in a storm, and we’re in about 3 inches of water and it was hard to make it even look like they were at sea at all, you know! But then we were trying to film it like this epic storm moment actually happened, so we were out there like in the sea up to our knees with people in inflatable boats acting like ‘agh....we’re in the middle of the Atlantic’ like, the rain and wind howling, and just like for a moment it was all awful. But, because it really happened and it really was awful, that audio has ended up being able to be something that we can use.

Q Oh OK.

A And we’ve like, you know, cleverly popped it together with like either blackness or some stock footage in?? to create the storyline for how it finishes.

Q It sounds really interesting. Where are you going to launch it, where is it coming out?

A It’s launched online, so it can be seen on Vimeo now. And we’ve been basically plugging it around Facebook as hard as we can and just trying to get the number of views up. So the last I heard we’d got about 300 people had viewed so far.

Q Oh OK. So which Facebook page is this?

A It would be....the page is called Well Red Films, which is Red as in the colour, Well Red. They are....if you go to my [personal user name] page that’s the place you can see it most easily at the moment actually.

Q OK. Is that a blog that you have, or a website?

A If you Google [personal user name] it’s everything. You can’t miss me.

Q OK. Are you on like Twitter and things like that?

A Yeah, Twitter, Facebook, LinkedIn, and I’ve got my own [personal user name].com

Q So is it the sort of film that Jeremy and Cerys could see?

A Yes.

Q Or have they seen it?

A No I haven't shown it to them yet. I want to try and get it on the big screen and I haven't figured out that tech yet. But we do film night Sunday night, we're watching the Philip Pullman series.

Q Oh, His Dark Materials.

A Yeah. So I might try and get it on before that.

Q So have you been having like family TV night on Sunday nights where you watch that?

A Yeah.

Q So you might have a premiere of....

A I might do! Yeah we also, we're going to try and get it done and shown at the Showroom Shorts, and we're entering it into Sheffield Docfests alternative realities category.

Q Oh that's sounds great.

A Yeah. One of my....that's what I've done, that's it, after that everything went quiet with film-making with them and all I've got is that. In return for what I did, to be fair, they paid for me to go on a course in Oxford, and a couple of us went down and we all did an editing course so we could learn how to actually edit film footage. But then none of us actually have film footage software, and it costs a lot of money, and we've all got stuck at that point anyway, we've not been able to move forward.

Q OK that's great. I can see.....oh thank you so much.

B That's my card and that website, I do offer ???

Q Brilliant.

B ??? I do hosting through Denise's website and....

A Yeah he hosts my website, that is true.

B There is IT services available, and a lot of it's just giveaway stuff.

Q Ah, so you have websites each? That's great.

A Yeah he's got a website which is the domain site that can host up to five other sites, so I'm one of the one he hosts, so that I just pay half of his costs off, and together that's quite cheap. If we had one other person we would pay nothing. He could have four others. Hasn't found those other customers yet.

B ???

A But yeah in my office. What were your questions that you asked, because I doubt he'd have told you all the answers.

Time 1:05:00

Q Jeremy showed us your computer and your screens, and he said as well that you had a digital camera in there as well.

A Yes.

Q He mentioned that you were on Windows? so you had Cortana which was why you had the speaker as well.

A Yeah.

Q Does Jeremy and Cerys ever talk to Cortana actually?

A They do more than I do. I mostly tell her to shut up and go away.

Q Really? What do they say to her?

A Oh they use her to Google things when they use the computer, whereas I just don't. And then she turns herself on randomly because I've muttered or from something in my music. And she gets in my way and I mostly say 'go and die'. And that's why I don't want any of that kind of Alexa stuff in my house because it's....

Q Oh right, so you don't have any kind of Alexa or...

A Yeah it's really not that hard to get off your bum and turn a switch on really is it at the end of the day? We have, in the hallway here we have a motion activated light anyway, so you know like it just turns on if you're walking through it. That's really all you need, I don't need to tell it to turn on and off.

Q Do you ever see them play with Cortana, or do they ask her....what sort of things can you think of asking her?

A Oh...they did, like when they first realised it was on there, play with it a bit more just seeing what she could do basically I think. But not much now, they've both got bored of that person.

Q So Jeremy mentioned Cortana, and I think....

A Yeah. So round the back there, in that he wouldn't have mentioned because he wouldn't even think about it, stored in the back is like kind of old computer equipment as well. I've got a very large A3 colour printer back there which is able to do A3 plus size prints, like ??? prints ???

Q Was that used for as part of your business?

A Yeah it was the theory, it hasn't got used as much as I like because it sits for too long in between and then it just doesn't want to work when I wanted to use it, so it's just been one of those, oh bloody hell annoying things.

B ???

A Yeah.

Q Oh wow, that's an amazing print. What is that picture representing?

A Oh that's near where Travis's home town is, so it's just an art piece that's in the wild on the side of the road in the middle of the desert basically. It's called The Wild Horses.

Q What's your home town called Travis?

B [Name].

Q [Name]

B Rodeo city.

Q Rodeo city!

A Yeah. But the oldest technology in the house would be in the back of my cupboard, which would be....it was given to me when I first decided to be a photographer by my dad, along with his old ??? camera he gave me his old slide projector.

Q Oh right OK.

A And white display stand thing. And they probably date from the 60s and they're still up there, and they still occasionally come out and they still occasionally do – and they work when you want them to!

Q That sounds like a sort of heirloom doesn't it?

A Yeah. Actually he gave me the camera and I used the camera and I learnt how to be a photographer on the camera, and I've just put a post, a picture of that, actually on my Facebook page this week. Because I've seen something that's like a 20 year anniversary and it sent me off a load of reminiscing and then I found this picture and I'm like 'oh there's my old Leg? camera and it's still the case'. I wish I still had that, I would die for that back.

Q Do Cerys or Jeremy show an interest in photography themselves?

A More I would say in filming.

Q OK. Because I think Jeremy has shared GoPro videos of him gaming but are there other things?

A Yeah, I mean when they've got cameras they will use them quite avidly, and they take pretty good pictures, they've got quite an interesting eye, it's interesting to see what they pick up. But they like blogging, they like TikTok, I think their outlets are more video, so I think ultimately yeah they're more about filming.

Q When did they get into TikTok, because I...

A Oh my daughter's just introduced me to it this week, so I never knew it existed before. Her friend put it on her phone, I'm thinking there must have been a 'I lied and said I was older than I was' thing going on there because I've had a look at it! But Cerys's now forgot the password and she can't get back on, so I'll call that the end of that.

Q Is Jeremy interested in TikTok or anything like that?

A I don't know if he saw it or anything, I don't know, I've no idea what his opinions are with TikTok yet, I just sort of saw my daughter on it. It was one of those, you know when you just go 'oh my God, a whole new thing to be worried about, what's this?'

Q What would you be worried about with TikTok do you think?

A Oh because the first thing I knew about it was my daughter was posting videos and sharing them, and she's sharing them with strangers. I'm like 'where are they going, who is seeing them, what?' because she's watching these things that other people are doing, and I'm like 'is this Twitter, what is this, how public is it, what's going on, I haven't got a clue'. I think you know you can probably set parental settings on it or something, but I didn't put it on there so I don't know what settings they've got. And they probably lied. So you know you can't keep up with the kids, they find new games and.... you know that's what I'm most worried about is like my son is now that age where the next thing I know about he's going to have whatever, Tinder or some nasty porn thing going on on his phone. And they find it long before you even know it exists, do you know what I mean?

Time 1:10:09

Q I wondered whether you'd ever had that experience of thinking that [vulnerability online], or whether that was something which you feel that he's fairly sensible or....

A I was worried about it online, and I was worried about in his reality as well. Because you know like he learns to befriend people, and then he went and befriended the entire world, and he would befriend strangers at bus stops. And he didn't have any kind of stranger danger, like 'maybe that person isn't someone to befriend' you know. So his boundaries are pretty, you know you have to like lay one down for him or he doesn't have it, in lots of ways anyway. So yeah online, yeah I sometimes worry. But the school, when I ask him about like how he should behave and what he does and if someone's chatting to them and that person wants to meet you in the real world what you do about it and stuff, and I ask them questions. And they always give me the right answers. The school's taken them through it really, which is good and that's reassuring to me to think that the school's helping, because they? might be more in it than I am. You know I think they surely are, because you know it's impossible isn't it to keep up, I don't know.

Q Yeah. No I was just curious because I am aware it is ???

A I used to work in a women's refuge for a long time and I saw and heard a lot of terrible stories. You know the Helpline would be someone responding to it behind my ears so you can guess a lot of what's going on from the answers they're being given, do you know what I mean?

Q Yeah.

A Lots of people that I worked with had ??? the child's been through abuse. And one of the things that I found very frustrating when I was talking to the people who had been through the abuse when they were trying to work out what to do in terms of how they'd respond to our own residents and their children and the refuge and how we were providing provision for them was, when it came down to the internet use. They absolutely didn't want to provide any because they were worried about the bad side. And I absolutely really needed them to do it because I wanted them to be able to access all the good side.

Q Yeah, so you see positives.

A Yeah. It's one of those difficult things isn't it? Teachers say 'go home and Google blah, blah', if you are not online you are not part of the modern world. And I think leaving people locked out of it is not fair. So for me, the best way to deal with it is to try and explain what dangers you know of, point them out, say 'don't go near that one'. So I've told them don't go near Snapchat because everything I've ever heard about that is like it's the land of bullying. And I saw something online this week that basically said Instagram is the place where grooming, paedophile grooming is most successfully happening. So I thought 'OK, right, we're going to stay well away from Instagram then'.

C Already planning to do.

A Yeah, but you know it's difficult isn't it, like at the same time Facebook is the one that's like crushing our democracies, but I'm very invested in Facebook already, spent many hours building up my followers, so it's hard to turn your back. I'm having a bit of Facebook dilemmas at the moment. It's like unless they start banning political ads I'm going to have to crash out.

Q OK yeah.

A It's alright, I've still got Twitter, it's OK.

Q OK I think I'm going to leave it there. Thank you so much.
