

Q Julia Bishop (researcher)  
Q2 Alex Hetherington (researcher)  
A Serena (Mum)  
B Kawsu (Dad)  
C Mallison (6)  
D Essa (4)

Q Have you seen it on TV or when you were.... It was the IT class that was on at school on Friday.

A I didn't even know about it, he didn't tell me that. Mallison!

C So Alex, this is good, Hot Wheels.

Q2 Is it?

C Hot Wheels.

Q Hot Wheels, OK.

C I have a thousand cars for it. These are the cars for it, Essa's probably just put them in.

D Some of them are here.

A Mallison, Julia wants to ask you about yesterday because I didn't know about this so can I listen as well.

C This is one about the cars.

Q2 I see. You can show me a little bit later if you like. So why don't you just put a track together for me to see.

Q Hey Mallison, do you think it would be really good if they did Hot Wheels in the VR glasses? Imagine, you could be the driver, could you imagine, up and down on your Hot Wheels thing?

C Yeah.

Q That would be amazing, wouldn't it?

C Yeah.

Q You could do all those sorts of things with VR, I think.

C It would be actually really good.

Q Yeah? Do you imagine that?

C In a Hot Wheel car....yeah.

Q I can see you're imagining that now, you're holding the steering wheel and you've got your eyes shut. I suppose VR glasses are a little bit like being inside your imagination.

A I haven't seen them.

C Yeah they are actually aren't they A.

Q2 They are.

Q So what does it feel like? I've only put them on once and it was a roller coaster and I started to feel a bit like woozy. What was it like for you, what was the experience like for you?

C Well I was on a dinosaur. It was like...I liked that, and just ends? in a car. The ending was on the car anyway. That roof didn't have any....oh I keep forgetting the word now. The car had no roof.

Q The car had no roof, ah. This was in the VR glasses that you saw the car?

C Yeah and it just had this thing like, and I were like, I were literally standing up in the car. I thought I was in....yeah I was standing up. I was like ??? but there was only one.

Q2 There was only one.

Q Yeah. So what did you see?

C Dinosaurs.

Q It was dinosaurs. So where does the car bit come in?

Q2 It's a roller coaster. It's like a theme park ride.

Q Oh. So you were on a roller coaster. So how did the dinosaurs come into that experience?

C I don't know, they were just in ??? It was literally, I couldn't get out of it, I couldn't, there was no way of getting out.

Q You can't get out of it. That's right.

Q You were immersed. Mallison, do you mean you couldn't get out of the experience, it was like all around you?

C Yeah because there were walls around me and I couldn't get out of it.

Q Right. Well how did that feel, was it scary or was it quite thrilling, or fun or, what's the word you'd use?

C Fun.

Q Fun. Fantastic. Would you do it again?

C Yeah.

Q Did it make you feel dizzy or seasick or anything like that?

C No, but I just...I would love the Hot Wheels one. If I was in one of my favourite cars, which I would drive like, oh that's one of them. These are some of my favourite cars.

Q OK, what do you like about those ones particularly. I like the colours but what attracts you about them?

C Because they're small and they can do stuff. And I'll show you what ??? and it makes them speed into A.

Q2 Oh oh.

A I think it might be because we....they made a track with the Hot Wheels and it's where....

C No.

A ....that thing there shoots it and it flips them round a kind of route.

Q Oh like a....

A And they figured out that if the car was heavy it fell off, or if the car was large it fell off, and too small it fell off. And so they had to find the cars that didn't flip off.

Q Right. Gosh that was a feat of engineering deduction that you....

A I know, I should have took a photo of it actually. But it were just the fact that we had to go through all the cars and figure out which one wouldn't drop off.

Q Oh I see, oh that's very interesting.

A I can show you a picture of it. Mallison get the instructions and then we can show her a picture of the....

C What?

A You can show Julia a picture of the track that we made and the cars that flipped.

Q2 I'll take a picture of it as well.

Q Oh wow you've actually made that particular one.

A     Yeah.

Q     Wow, that's amazing.

A     And that's why he's saying he likes those.
