

Q Julia Bishop (researcher)
Q2 Alex Hetherington (researcher)
A Serena (Mum)
B Kawsu (Dad)
C Mallison (6)
D Essa (4)

Qflashes red in the corner when it does it. Is that alright?

A Can you do it?

Q That's it, you've done it, it is doing it, it is doing it. Just press that one. It doesn't stop it because it's also on video mode you see. It's doing it, you've taken about six. So show us all your favourite stuff here.

Q2 So what are you taking ???

C Balloon.

Q2 A balloon ???

A What about that thing that June bought you Mallison that you like to play on that attaches to the TV, in the corner, it's behind Daddy.

Q2 What are we taking a picture of now? What's that? Cards.

A No I'm just saying, I just took some random pictures of the toys he's got upstairs.

Q Oh yeah, so is this Mallison's room now?

A Yeah, and that's his book he's reading at the minute.

Q Oh fantastic. Oh he's on to Harry Potter, lovely.

A Well I read it to him but he does sometimes read a page.

Q Do you look at the films or anything like that, or has he got any of the merchandise?

A Well he has seen the films but only because they've been on at my mum's house when he's been there. But I don't know if he's sat and watched it from start to finish.

Q No but he's obviously aware of them isn't he?

A Yeah.

C Minecraft.

Q And is that because he cousins are into it?

A Yeah, my nephew's really into it. And then they're just some....in a cupboard we've just got some board games and jigsaws and....

Q Are they played very much, the board games?

A I wouldn't say they are, no not really.

Q2 Dinosaur.

C The dinosaur.

A They play with this a lot – what's that called....

Q Star Wars?

C Star Wars ???

Q Is it like a Trump Cards game or.....

A No it's like a....

Q Is it electronic? I can't see.

A What's the thing called where you.....pin ball. It's a pin ball.

C Pin ball.

Q Pin ball, oh wow. Is it like digital or anything, or is it just mechanical. Has it got batteries or....

A You shoot it up and then it's got little levers there that you....I can fetch it down and show you. But they do play with that a lot. But there's stuff under the bed that he doesn't even touch because he doesn't look. If it's not in front of his face they don't get it out and put it there.

Q This is what you were saying, he responds to what's in the room as it were.

A Yeah, he doesn't look round. And he's more likely to build towers from boxes and stuff like that than he is actually to play with toys.

Q2 What do you play with this ramp with?

C Cars.

Q2 Cars.

C Essa's new motorbike.

Q2 Essa's new motorbike.

Q That reminds me that another visit we thought, better than talking which I know is tough for all of our children in the study, we wondered if it would be possible and OK with you to have some of his building stuff, his modelling type stuff, and for him to like build us something during the course of the session?

Q2 OK, so things go down the ramp?

C Or like this.

Q2 Or up the ramp, yeah? Do you have any pictures of these? Take some more pictures.
