

- Q Julia Bishop (researcher)
Q2 Alex Hetherington (researcher)
A Serena (Mum)
B Kawsu (Dad)
C Mallison (6)
D Essa (4)

Q That's fantastic, what made you think of....

A Do you know, I actually think I could do that, I actually think I could build a ??? you know like the big LEGO, like things that they put in like LEGOLand and stuff like that, I think I could actually, I'd be alright with that. But I wouldn't be surprised if they've got robots doing it by the time they get any bigger, they'd get ???

Q2 I think you'd need a pretty good robot, but maybe....

A It's all computerised, isn't it?

Q2 I think some of the big things like that, yeah. I think they computerise like the repetitive stuff, but like the creative part, I think that's got to be....

A Is it?

Q2 Yeah.

A Oh it's very clever.

C Living rooms, four bedrooms or summat like that.

A What are you talking about, building a house?

Q Like a dolls house but out of LEGO. OK we're going to leave you in peace now.

A Yeah I was going to say, I don't think it's a special....they've not done this especially for you, this is just what they do, you know like day-to-day.

Q Yeah, it's their natural....

A Yeah.

Q Yeah, so that's fantastic.

A Which is the right way round, isn't it?

Q We're really honoured that you've let us in to what you do on a day-to-day basis.

A No, it's just normal play, it's just.... Because it's a random set [of LEGO] that they've just been allowed to just kind of go wild with and just build whatever. Which is I'd probably

File Name: F1r_20191130_at005

be more like 'come on, we're going to follow the instructions, let's do it this way round'. But maybe I'll encourage that more now because there's more meaning to it.
