2018-03-05 MUSEUM PILOT ACTIVITY MATERIAL --> Bilde_stimuli_03.pdf
2018-03-18 INTERVIEW KINDERGARTEN - Transcript of interview.docx

How/when/where the data were collected, including details of participants and settings:

The open repository data from Norway does not contain any material where people can be recognized.

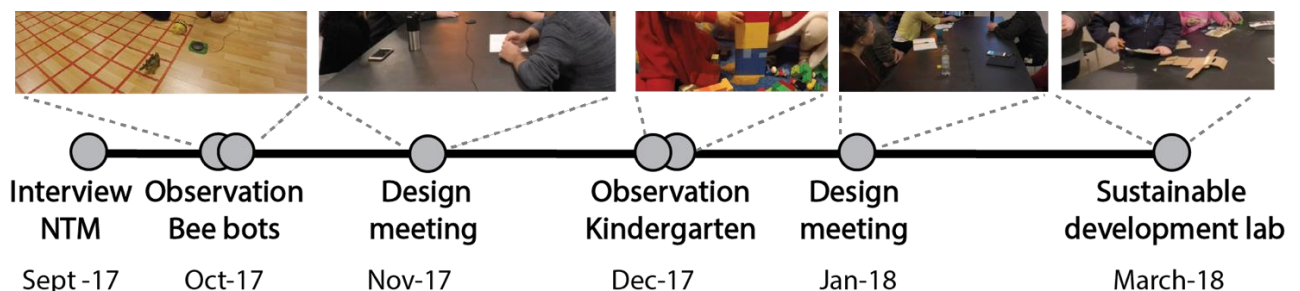

The primary data consist of photos, video and audio recordings. These may be anonymized, but this process is costly and time consuming and is not done at this time. In addition, there are transcripts of interviews and videos. These are anonymized and submitted to the repository. All data is in Norwegian.

Settings: 1) Museum: A science museum that has established a dedicated makerspace in the museum. 2) Kindergarten: A kindergarten located close to the museum, which is situated in a typical middle-class area. We recruited the kindergarten through the museum.

Interviews were undertaken with practitioners who took part in the activities. These were conducted during and after the completion of the makerspace projects. The interviews were undertaken at a time and place convenient to the practitioner. The interviews were digitally recorded and selected parts were then transcribed.

All makerspace activities and design meetings were video recorded and selected parts were then transcribed.

The following illustration shows the settings in which there are data:

The repository is structured accordingly:
